

Notes on Accident & Emergency (A&E) Services

If students are advised by teaching staff to be sent to hospital due to injuries or illnesses, the school will contact parents and obtain consent before further actions (if time allows). Therefore, parents must provide a correct emergency contact to the school and update the school immediately for any changes.

If students suffer from severe injury or are under critical conditions and must be sent to the hospital, the school will contact ambulance service and send the students to the A&E services of the nearest public hospital. The school will request parents to head to the school or directly go to the hospital. If parents decide to transfer their children to private hospitals, please consult and seek professional advice from medical staff.

Some measures of the Hospital Authority on patients using A&E services are listed below:

- All patients who use the A&E services (including students) must pay a toll of \$180.
- Students sent by the school to public hospitals (nearest being Caritas Medical Centre) will receive payment notice after receiving medical service. Students or parents can choose to pay immediately or later at own convenience.
- Patients with financial difficulties can apply for fee waiver or reduction through Medical Social Workers according to the current waiving mechanism.

[Teacher-in-charge: Deputy Head, Ms. CHAN Shuk Fan]
